Required by Virginia Law: I give permission to the school nurse and designated school the diabetes care tasks for my child as outlined in my child prescribing health care provider. (Code of Virginia § 22.1-274)	's Diabetes Medical Man	

Parent authorization for trained school designees to administer:

INSULIN Yes No

GLUCAGON	🗌 Yes

□ No

I consent to the release of information contained in the Diabetes Medical Management Plan to staff members and other adults who have custodial care of my child and who may need to know this information to maintain my child's health and safety. I also give permission to contact my endocrinologist and members of the diabetes management team regarding my child's diabetes should the need arise.

*Note: If at any time you would like to have the names of the designated school personnel that have been trained, please contact the school nurse. Names and training records are kept in the school clinic.

Medical History	Parent/Guardian Response (check appropriate boxes and complete blanks)
Diagnosis information	At what age? Type of diabetes? Type 1 Type 2 Other
Allergies (include foods, medications, etc.)	
How often is child seen by diabetes healthcare provider?	Frequency: Date of last visit:
Nutritional needs	Gluten Free <u>Other</u>
Snacks	 AMPM Per parent / guardian (i.e Before exercise/activity to prevent hypoglycemia, insulin is NOT administered with these snacks.) In the event of a class party / special activity – per parent/guardian's discretion
Child's most common signs of low blood glucose	trembling tingling loss of coordination dizziness moist skin/sweating slurred speech heart pounding hunger confusion weakness fatigue seizure pale skin headache unconsciousness change in mood or behavior other
Has your child ever experienced an episode of hypoglycemia that required an emergency response?	Yes Date Please explain:
Frequency of hypoglycemia	 once a day once a week once a month Indicate date(s) of last episode(s) What time of day is most common for hypoglycemia to occur?
Illness/hospitalizations in the last year	Date(s) and describe:
List any other medications currently being taken	Name of Medication Dose When to give Oral / Injection Duration Image: Strain S
Other concerns and comments	

Su	pplies to bring to school:		
•	Glucose meter, testing strips, lancets, and batteries for the meter	•	Carbohydrate-containing snacks, such as whole grain crackers, dried fruit or yogurt
•	Urine and/or blood ketone test strips and meter	•	Hypoglycemia treatment supplies; quick-acting glucose and carbohydrate snacks
•	Insulin(s), syringes, and/or insulin pen(s) and	•	Water
	supplies	•	Glucagon emergency kit
•	Insulin pump and supplies, including syringes,	•	Antiseptic wipes or wet wipes
	pen(s), and insulin(s) in case of pump failure	•	Other medications

□ Other

Virginia School Diabetes Medical Management Plan (DMMP) Part 2

Notice to Parent(s) / Guardian(s):

Medication(s) must be brought to school appropriately labeled by the pharmacy or physician/healthcare provider.

In order for schools to safely administer medication in the school setting, the following should be observed:

A new copy of the DMMP must be completed at the beginning of each school year. ≻

□ Type 2 Diabetes

- This form or healthcare provider prescription must be received in order to change diabetes care at school, except for ≻ those changes indicated for parent's / guardian's adjustment.
- Trained school personnel may assist child in increasing independence with self-management skills as ≻ developmentally appropriate with parental / guardian consent.

Student's Diagnosis: □Type 1 Diabetes

		штурс	MONITORING

Tobe	INSULIN To be administered subcutaneously by insulin pen; insulin vial and a syringe; or insulin pump ALWAYS treat hypoglycemia before administration of insulin.						
Insulin to be given during school hours:							
□ INTENSIVE COLUMN A + COLUMN B = TOTAL INSULIN DOSE							
 COLUMN A (CARBOHYDRATE COVERAGE) = # carbohydrates consumed ÷ carbohydrate ratio COLUMN B (CORRECTION DOSE) = actual blood glucose – target pre-meal blood glucose ÷ correction factor When rounding, only round the total insulin dose If uneven, then round to the nearest half or whole unit. (for example, total dose = 1.4 units- then give 1.5 units) If physical activity follows meal, then may round down. (for example, total dose = 1.4 units – then give 1.0 units) 							
INSULIN TYPE	Car	COLUMN A bohydrate Coverage			COLUI Correctio

AUTHORIZATION TO TREAT AND ADMINISTER MEDICATION FOR THE ABOVE VIRGINIA SCHOOL DIABETES MANAGEMENT PLAN

My signature below provides authorization for the Virginia Diabetes Medical Management Plan contained herein. I/We understand that all treatments and procedures may be performed by the school nurse, the student, and/or trained, unlicensed designated school personnel as allowed by school policy or by Emergency Medical Services in the event of loss of consciousness or seizure.

I also give permission for the school and school nurse to contact the health care provider regarding these orders and administration of these medications.
