

Proactive Measures to Keep Our Learning Environment Healthy

One Franklin Street,
Hampton, Virginia, 23669
757-727-2000
hampton.k12.va.us

What you can do to help keep our students healthy:

Clean your hands after arriving and before leaving.

Wash hands often.

Always cover your cough.

Use a tissue or sleeve when you cough or sneeze.

Clean your hands after coughing or sneezing.

Avoid touching your eyes, nose or mouth.

Stay home for at least 24 hours after fever is gone before returning to school.

What we are doing:

Upgrading our surface disinfectants to a top-of-the-line, hospital-grade disinfectant to treat all "touch points" (e.g., door handles, table tops, desks, light switches, keyboards)

Using disposable cloths for cleaning

Utilizing the hospital-grade surface disinfectant daily on all school buses

Utilizing electrostatic disinfectant machines in our schools - a revolutionary new sprayer that disinfects more areas more efficiently with a 360-degree coverage, meaning when you spray one side of an object or surface, the cleaning power extends all the way around it

Ensuring all restrooms have antimicrobial soap

Increasing signage in our schools - "Ways to Help Protect Our Students" signs, "Cover Your Cough" signs, as well as "Wash Your Hands" signs
